SUBJECT INDEX TO VOLUME 50

Aerodynamics of Film Cooling Jet Interaction in a Dump Combustor, 361
Air Supply Opening Model of Ceiling Diffusers for Numerical Simulation of Indoor Air Distribution under Actual Connected Conditions, Part I: Model Development, 45

Buoyancy on Vortex Shedding and Heat Transfer from a Square Cylinder in Proximity to a Wall, Influence of, 585

Convective Heat Transfer from Two Identical Square Cylinders Submerged in a Uniform Cross Flow, Numerical Study of, 21
Cool-Thermal Discharge Systems from Ice Melting with Chilled Air Produced Under Complete Melt Removal and Specified Heat Fluxes on the Boundary, Recycle Effect on, 883

Finite-Element Analysis of Coupled Nonlinear Heat and Moisture Transfer in Wood, 851
Flame Normal Vector in Turbulent Premixed Flames, Statistical Behavior and Modeling of the, 623
Fully Developed Electroosmotically and Hydrodynamically Induced Convection Between Two Parallel Plates, 905

Heat and Mass Transfer in a CVD Optical Fiber Coating Process by Propane Precursor Gas, 147
Heat Conduction of SnS-Cu_xS Solar Control Coated Semitransparent Wall on Turbulent Natural Convection in a Square Cavity, Effect of, 79
Heat Transfer and the Optimization of Regenerators, Numerical Analysis of, 63
Heat Transfer in a Gas-Saturated Powder Layer Subject to a Short-Pulsed Heat Source, Nonequilibrium Modeling of, 205
Heat Transfer in a Gas-Saturated Powder Layer Subject to a Short-Pulsed Heat Source, Nonequilibrium Modeling of, 509
Heat Transfer, Phase Change, and Thermocapillary Flow in Films of Molten Metal on a Substrate, 301
Heat Transfer Study of Two-Dimensional Laminar Incompressible Wall Jet over Backward-Facing Step, 165

Interactions of Vortices Generated by Vortex Generators and Their Effects on Heat Transfer Enhancement, Numerical Study of, 345
Inverse Determination of Wall Temperature During Constant Energy Input, 401
Inverse Radiation Design Problem in a Two-Dimensional Radiatively Active Cylindrical Medium Using Automatic Differentiation and Broyden Combined Update, 221
Inverse Radiation Design Problem in a Two-Dimensional Radiatively Active Cylindrical Medium Using Automatic Differentiation and Broyden Combined Update, 525
Inverse Radiation Problem in Determination of the Inlet

Temperature Profile for Two-Phase Laminar Flow in a Channel, 1

Laser-Induced Modification Processes of Ceramic Substrates, Numerical Simulation of, 835
Laser Pulse Heating of Steel Surface: Consideration of Phase-Change Process, 787
Length and Inclination of a Thin Fin on Natural Convection in a Square Enclosure, Effect of, 381
Local Heat Transfer for the Evaporation of a Laminar Falling Liquid Film on a Cylinder: Experimental, Numerical, and Inverse Heat Conduction Analysis, 667
Longitudinal Rolls of Poiseuille-Rayleigh-Bénard Flows in Air-Filled Channels of Finite Transversal Extension, Stability analyses of, 467

Marangoni-Rayleigh-Benard Convection on the Process Parameters in Blown-Powder Laser Cladding Process—A Numerical Investigation, The Effect of, 689
Multiscale Model to Predict Slurry Erosion in Cavitated Duct Flows, 241
Multiscale Model to Predict Slurry Erosion in Cavitated Duct Flows, 545

Natural Convection Around Isothermal Horizontal Rectangular Ducts, Numerical Investigation of, 189
Natural-Convection Flows in Air-Filled, Differentially Heated Cavities with Adiabatic Horizontal Walls, 437
Natural Convection in a Cubic Cavity: Implicit Numerical Solution of Two Benchmark Problems, 99
Natural Convection in a Partitioned Rectangular Enclosure, Numerical Investigation of, 975
Natural Convection in a Tilted Rectangular Slot Containing Non-Newtonian Power-Law Fluids and Subject to a Longitudinal Thermal Gradient, 277
Natural Convection in a Tilted Rectangular Slot Containing Non-Newtonian Power-Law Fluids and Subject to a Longitudinal Thermal Gradient, 561
Natural Convection of Micropolar Fluids in an Open Cavity, 257

Optimal Temperature Distribution in a Three-Dimensional Triple-Layered Skin Structure Embedded with Artery and Vein Vasculature, 809
Optimum Design of Two-Row Slotted Fin Surface with X-Shape Strip Arrangement Positioned by "Front Coarse and Rear Dense" Principle, Part I: Physical/Mathematical Models and Numerical Methods, 731
Optimum Design of Two-Row Slotted Fin Surface with X-Shape Strip Arrangement Positioned by "Front Coarse and Rear Dense" Principle, Part II: Results and Discussion, 751

Parameter Identification in Two-Dimensional Fins Using the Boundary Element Method, 315
Particle-Tracking Random-Walk Computation of High-Peclet-Number Convection, 607
Periodic Flow Pattern and Convection Heat Transfer in an Arc-Shaped Cavity with Oscillating Lid, 491

Plume Flow from a Heated Disk, Numerical Simulation and Experimental Validation of, 645

Radiative Exchange in an Enclosure with Specular Surfaces, An Effective Calculation Method for, 865

Sphericosymmetric VOF Approach for Investigating Immiscible Two-Phase Systems with One Liquid Phase, 949
Surface Heating Distribution to Establish Targeted Thermal Environments in Industry Hydrothermal Autoclaves, Determination of, 419

Temperature-Dependent Thermal Conductivity Problems Using a Meshless Method, Numerical Solution of, 125
Transient Behavior Inside a Vertical Cylindrical Enclosure Heated from the Side Walls, 773

Vapor Generation from the Surface of Gasoline Flowing in an Inclined Channel Using a Continuous Thermodynamics Approach, A Study to Determine, 705

Whole-Domain and Sequential Algorithms for Function Specification Method in the Inverse Heat Transfer Problem of Laminar Convective Pipe Flow, Comparison of, 927

CONTENTS TO VOLUME 50

CONTENTS Vol. 50, No. 1

1 Inverse Radiation Problem in Determination of the Inlet Temperature Profile for Two-Phase Laminar Flow in a Channel **Yun Ky Hong and Seung Wook Baek**

21 Numerical Study of Convective Heat Transfer from Two Identical Square Cylinders Submerged in a Uniform Cross Flow **Jianlei Niu, Zuojin Zhu, and Shenghong Huang**

45 Air Supply Opening Model of Ceiling Diffusers for Numerical Simulation of Indoor Air Distribution under Actual Connected Conditions, Part I: Model Development **Bin Zhao, Xianting Li, Hongze Ren, and Ping Guan**

63 Numerical Analysis of Heat Transfer and the Optimization of Regenerators **Weimin Gao, Peter D. Hodgson, and Lingxue Kong**

79 Effect of Heat Conduction of SnS-Cu_xS Solar Control Coated Semitransparent Wall on Turbulent Natural Convection in a Square Cavity **J. Xamán, and G. Álvarez**

CONTENTS Vol. 50, No. 2

99 Natural Convection in a Cubic Cavity: Implicit Numerical Solution of Two Benchmark Problems **Beth Anne V. Bennett and Jason Hsueh**

125 Numerical Solution of Temperature-Dependent Thermal Conductivity Problems Using a Meshless Method **Akhilendra Singh, Indra Vir Singh, and Ravi Prakash**

147 Heat and Mass Transfer in a CVD Optical Fiber Coating Process by Propane Precursor Gas **Wei Huang and Wilson K. S. Chiu**

165 Heat Transfer Study of Two-Dimensional Laminar Incompressible Wall Jet over Backward-Facing Step **P. Rajesh Kanna and Manab Kumar Das**

189 Numerical Investigation of Natural Convection Around Isothermal Horizontal Rectangular Ducts **O. Zeitoun and Mohamed Ali**

CONTENTS Vol. 50, No. 3

205 Nonequilibrium Modeling of Heat Transfer in a Gas-Saturated Powder Layer Subject to a Short-Pulsed Heat Source **Yuwen Zhang**

221 Inverse Radiation Design Problem in a Two-Dimensional Radiatively Active Cylindrical Medium Using Automatic Differentiation and Broyden Combined Update **Ki Wan Kim and Seung Wook Baek**

241 A Multiscale Model to Predict Slurry Erosion in Cavitated Duct Flows **Yang-Yao Niu and Yee-Ming Lin**

257 Natural Convection of Micropolar Fluids in an Open Cavity **T. H. Hsu and K. Y. Hong**

277 Natural Convection in a Tilted Rectangular Slot Containing Non-Newtonian Power-Law Fluids and Subject to a Longitudinal Thermal Gradient **M. Lamsaadi, M. Naïmi, M. Hasnaoui, and M. Mamou**

CONTENTS Vol. 50, No. 4

301 Heat Transfer, Phase Change, and Thermocapillary Flow in Films of Molten Metal on a Substrate **Vladimir S. Ajaev and David A. Willis**

315 Parameter Identification in Two-Dimensional Fins Using the Boundary Element Method **L. Marin, X. Wen, L. Elliott, D. B. Ingham, D. Lesnic, and P. J. Heggs**

345 Numerical Study of Interactions of Vortices Generated by Vortex Generators and Their Effects on Heat Transfer Enhancement **Changlin Zhu, Hua Liang, Dongliang Sun, Liangbi Wang, and Yongheng Zhang**

361 Aerodynamics of Film Cooling Jet Interaction in a Dump Combustor **S. Mondal, A. Datta, and A. Sarkar**

381 Effect of Length and Inclination of a Thin Fin on Natural Convection in a Square Enclosure **Abdullatif Ben-Nakhi and Ali J. Chamkha**

CONTENTS Vol. 50, No. 5

401 Inverse Determination of Wall Temperature During Constant Energy Input **A. Haji-Sheikh and J. V. Beck**

419 Determination of Surface Heating Distribution to Establish Targeted Thermal Environments in Industry Hydrothermal Autoclaves **Hongmin Li, Guo-Xiang Wang, and Edward A. Evans**

437 Natural-Convection Flows in Air-Filled, Differentially Heated Cavities with Adiabatic Horizontal Walls **Shihe Xin and Patrick Le Quéré**

467 Stability analyses of Longitudinal Rolls of Poiseuille-Rayleigh-Bénard Flows in Air-Filled Channels of Finite Transversal Extension **Shihe Xin, Xavier Nicolas, and Patrick Le Quéré**

491 Periodic Flow Pattern and Convection Heat Transfer in an Arc-Shaped Cavity with Oscillating Lid **Chin-Lung Chen and Chin-Hsiang Cheng**

CONTENTS Vol. 50, No. 6

509 Nonequilibrium Modeling of Heat Transfer in a Gas-Saturated Powder Layer Subject to a Short-Pulsed Heat Source **Yuwen Zhang**

525 Inverse Radiation Design Problem in a Two-Dimensional Radiatively Active Cylindrical Medium Using Automatic Differentiation and Broyden Combined Update **Ki Wan Kim and Seung Wook Baek**

545 A Multiscale Model to Predict Slurry Erosion in Cavitated Duct Flows **Yang-Yao Niu and Yee-Ming Lin**

561 Natural Convection in a Tilted Rectangular Slot Containing Non-Newtonian Power-Law Fluids and Subject to a Longitudinal Thermal Gradient **M. Lamsaadi, M. Naïmi, M. Hasnaoui, and M. Mamou**

585 Influence of Buoyancy on Vortex Shedding and Heat Transfer from a Square Cylinder in Proximity to a Wall **S. Bhattacharyya, D. K. Maiti, and S. Dhinakaran**

CONTENTS Vol. 50, No. 7

607 Particle-Tracking Random-Walk Computation of High-Peclet-Number Convection
Veysel Özceyhan and Mihir Sen

623 Statistical Behavior and Modeling of the Flame Normal Vector in Turbulent Premixed Flames
Nilanjan Chakraborty and R. S. Cant

645 Numerical Simulation and Experimental Validation of Plume Flow from a Heated Disk
J. R. Fontaine, R. Devienne, and S. Rose

667 Local Heat Transfer for the Evaporation of a Laminar Falling Liquid Film on a Cylinder: Experimental, Numerical, and Inverse Heat Conduction Analysis
H. Louahlia-Gualous and L. El Omari

689 The Effect of Marangoni-Rayleigh-Benard Convection on the Process Parameters in Blown-Powder Laser Cladding Process—A Numerical Investigation
Subrata Kumar and Subhransu Roy

CONTENTS Vol. 50, No. 8

705 A Study to Determine Vapor Generation from the Surface of Gasoline Flowing in an Inclined Channel Using a Continuous Thermodynamics Approach
R. Banerjee and K. M. Isaac

731 Optimum Design of Two-Row Slotted Fin Surface with X-Shape Strip Arrangement Positioned by "Front Coarse and Rear Dense" Principle, Part I: Physical/Mathematical Models and Numerical Methods
W. Q. Tao, W. W. Jin, Y. L. He, Z. G. Qu, and C. C. Zhang

751 Optimum Design of Two-Row Slotted Fin Surface with X-Shape Strip Arrangement Positioned by "Front Coarse and Rear Dense" Principle, Part II: Results and Discussion **W. W. Jin, Y. L. He, Z. G. Qu, C. C. Zhang, and W. Q. Tao**

773 Transient Behavior Inside a Vertical Cylindrical Enclosure Heated from the Side Walls
K. Choukairy, R. Bennacer, H. Beji, S. Jaballah, and M. El Ganaoui

787 Laser Pulse Heating of Steel Surface: Consideration of Phase-Change Process
S. Bin-Mansoor and B. S. Yilbas

CONTENTS Vol. 50, No. 9

809 Optimal Temperature Distribution in a Three-Dimensional Triple-Layered Skin Structure Embedded with Artery and Vein Vasculature **Xingui Tang, Weizhong Dai, Raja Nassar, and Adrian Bejan**

835 Numerical Simulation of Laser-Induced Modification Processes of Ceramic Substrates **M. Rohde, O. Baldus, D. Dimitrova, and S. Schreck**

851 Finite-Element Analysis of Coupled Nonlinear Heat and Moisture Transfer in Wood **John Eriksson, Sigurdur Ormarsson, and Hans Petersson**

865 An Effective Calculation Method for Radiative Exchange in an Enclosure with Specular Surfaces **Sae Byul Kang, Woo Il Lee, and Joon Sik Lee**

883 Recycle Effect on Cool-Thermal Discharge Systems from Ice Melting with Chilled Air Produced Under Complete Melt Removal and Specified Heat Fluxes on the Boundary **Chii-Dong Ho and Jr-Wei Tu**

CONTENTS Vol. 50, No. 10

905 Fully Developed Electroosmotically and Hydrodynamically Induced Convection Between Two Parallel Plates **Z. Yang, X. F. Peng, and B. X. Wang**

927 Comparison of Whole-Domain and Sequential Algorithms for Function Specification Method in the Inverse Heat Transfer Problem of Laminar Convective Pipe Flow **Cha'o-Kuang Chen, Li-Wen Wu, and Yue-Tzu Yang**

949 A Sphericosymmetric VOF Approach for Investigating Immiscible Two-Phase Systems with One Liquid Phase **Koushik Ghosh, Achintya Mukhopadhyay, Swarnendu Sen, and Dipankar Sanyal**

975 Numerical Investigation of Natural Convection in a Partitioned Rectangular Enclosure **C. D. Sankhavara and H. J. Shukla**
